OWENS CORNING PINK FIBERGLAS™ INSULATION

FOCUS: THIRD PARTY CERTIFICATION

HOW DO YOU KNOW A PRODUCT IS GREEN? THIRD PARTY CERTIFICATION!

Pursuing GREEN

Owens Corning prides itself in manufacturing green, sustainable, economical and energy efficient products but we do not stop there. We verify our products' green and sustainable attributes through recognized and reliable independent third-party certification.

In fact, a long-standing tenet of green building certification programs is to document product attributes through independent third-party certification whenever possible. This ensures that products are manufactured and perform at the exacting levels required by various programs. In this way, architects, builders and contractors can have confidence in product selection.

Achieving GREEN

The products Owens Corning sells each year are responsible for the prevention of more than one billion tons of greenhouse gas emissions. This equals the emissions of 200 million passenger cars or the use of 2 billion barrels of oil.

PINK PRODUCTS. GREEN SOLUTIONS.

WHY OWENS CORNING PINK FIBERGLAS™?

Highest Certified Recycled Content

Scientific Certification systems provides independent verification of recycled content in building materials and verifies recycled content claims made by manufacturers. At 50%, Owens Corning PINK FIBERGLAS™ Insulation has the highest certified recycled glass content in the industry. Owens Corning PINK Foam Products have 20% certified recycled polystyrene content.

For more information, visit www.scs-certified.com

GREENGUARD Certified

The GREENGUARD Environmental Institute is one of the most recognized and highly regarded third-party product certifications for testing VOC emissions. In addition to GREENGUARD certification, Owens Corning PINK FIBERGLAS™ Insulation obtained the more exacting GREENGUARD Children & Schools.

GREENGUARD Children & Schools

In California, the Collaborative for High Performance Schools (CHPS) supports GREENGUARD Children and Schools to satisfy CHPS Best Practices manual K-12. GREENGUARD tests for a myriad of volatile organic compounds. Owens Corning was the first insulation manufacturer to certify under GREENGUARD California Children & Schools.

For a list of specific Owens Corning products with certification visit: www.greenguard.org.

At Owens Corning, we want you to be as proud to use our products as we are to manufacture them!
